

Metalogix Migration Manager for SharePoint – Public Folder Edition

Provides fast, one-hop migration into SharePoint and Office 365

Metalogix Migration Manager for Microsoft SharePoint® – Public Folder Edition empowers Exchange and SharePoint administrators to simplify and expedite migration of Exchange public folder content to SharePoint, Office 365 or SharePoint Online. Capabilities include the ability to handle the complex mapping between Exchange public folder data types and views, and SharePoint sites, lists, libraries, and metadata columns. This powerful solution preserves the original data and metadata during the content migration, while rendering intuitive views in SharePoint for both Outlook and web browser users. Finally, Migration Manager for SharePoint – Public Folder Edition can be used as a recurring synchronization tool to maintain one-way content sync between Exchange public folders and SharePoint - including the synchronization of incoming email in an email-enabled public folder to a SharePoint list or library.

KEY FEATURES

▶ Migrate Quickly in One Hop

Migrate Exchange public folder content from on-premises Exchange directly into SharePoint, Office 365 or SharePoint Online in one simple operation. Run it in parallel to minimize the duration of your migration project.

▶ Office 365 Support

Migrate Exchange Public folder content to Office 365 or other instances of SharePoint online. Migration Manager for SharePoint is the only solution to pass Microsoft SharePoint Online Code Analysis Framework (MSOCAF) testing and get approved for installation in Microsoft data centers for BPOS-D and Office 365 Dedicated.

▶ PowerShell Support

Create migration jobs and schedule them to execute at a time that suits you with built-in support for PowerShell script generation and/or Windows Task Scheduler for maximum flexibility and the ability to run unattended migrations.

▶ Choose Your Email Message/File Format When Migrating to SharePoint

Migrate your email from Exchange public folders into SharePoint as standard EML or native Outlook MSG file format. Native MSG file formats allow you to open email in SharePoint using Outlook with full fidelity.

▶ Select Safe Connection Options for Exchange and SharePoint

- Exchange Server: provides a Messaging Application Programming Interface (MAPI) and Exchange Web Services (EWS) connectors.
- SharePoint Server: provides SharePoint Object Model, Metalogix SharePoint Extensions Web Service (approved by Microsoft in Office 365 Dedicated/BPOS-D deployments), and SharePoint Native Web Services (works with Office 365/BPOS-S) connectors.
- No direct writes to the SharePoint database.

▶ Get the Best View of Email in SharePoint

Metalogix Email Viewer Webpart delivers familiar Outlook-like email view in SharePoint from a web browser.

▶ Deploys Simply and Quickly

Takes only minutes to install and requires only the .Net Framework (Version 2.0). No dedicated server or cumbersome platform is required.

BUSINESS BENEFITS

- Makes migration to SharePoint from Public Folders quick and easy.
- Reduce cost of migration through automation.
- Migrate Exchange Public Folders to SharePoint, Office 365 and SharePoint Online

KEY BENEFITS

- Fast one-hop migrations
- Multiple message file formats in SharePoint
- Supports several connection types for Exchange and SharePoint
- Email-enables SharePoint Lists or Libraries

SUPPORTED SOURCE SYSTEMS

- Exchange 2000
- Exchange 2003
- Exchange 2007
- Exchange 2010

SUPPORTED TARGET SYSTEMS

- WSS 3.0
- MOSS 2007
- SharePoint Foundation 2010
- SharePoint Server 2010
- SharePoint Online (Office 365)

SUPPORTED OPERATING SYSTEMS

Migration Manager for SharePoint - Public Folder Edition can be installed on:

- Windows XP
- Windows Vista
- Windows 7
- Windows Server 2003
- Windows Server 2008 (32-bit and 64-bit) and R2

► **Email-enable Your SharePoint Lists or Libraries**

Synchronize email-enabled Exchange public folders to SharePoint, Office 365 or SharePoint Online Lists and Libraries on an on-going scheduled basis to provide the effect of email-enabled lists or libraries in SharePoint.

► **Delivers Type-safe Mapping**

Maps different types of Exchange folders, including standard ones (mail and post items), calendars, tasks and contacts, to equivalent SharePoint structures, such as document libraries, tasks Lists, contact lists, and calendar lists.

► **Analyze Public Folder Content Prior to Migration**

Browse, preview, and analyze your public folder content before migration. Perform pre-migration planning and estimating for your project based on aggregate item count and size.

► **Avoid Installing Software on the Exchange Server**

No software need be installed on the Exchange Server. Uses support MAPI and EWS Exchange APIs for public folder content migration.

► **Batch Your Work**

Batch multiple list migration operations for convenience and re-run them at any time. Run your migrations at night and view the results and logs in the morning. Once a job is created, use a PowerShell script to customize or execute it along with other administration processes.

► **Compliant**

We work closely with Microsoft to employ only supported best practices and we do not use any unsupported methods such as directly writing to the SharePoint database. Run migration activity only through the supported SharePoint APIs.

► **Easy to Use**

Metalogix Migration Manager for SharePoint – Public Folder Edition uses a familiar, tree-based, copy-and-paste style user interface that is similar to Windows Explorer.

► **Migrate Individual Items and Complete Folder Hierarchies**

Migrate everything from an individual mail or document, up to and including complete Exchange public folder structures, to a SharePoint, Office 365 or SharePoint Online environment in one easy step.
