

Change Log

Product Version: **8.5.0.3**

Date: **10/06/2017**

Maintenance Issues Resolved in 8.5.0.3

ID / LID (Legacy ID)	Content Matrix Edition	Title	Support Ticket Id
120360	SharePoint Edition	[Feature] Add functionality to check for Nintex Feature activation on target site collection when features are activated on source site collection.	00093594
301433	SharePoint Edition	[Feature] Add ability to switch from the SPO Azure APIs over to CSOM APIs if a file that is being migrated is too large to migrate with the Azure APIs, or if the file is not supported by the Azure APIs.	N/A
258370	SharePoint Edition	When migrating web parts from SP 2010 to SPO, any contents/settings inside a "Wiki Content web part" are not preserved. (Please see the 8.5.0.3 Known Issues for additional details).	00133864
280981	SharePoint Edition	Survey lists do not have their list settings preserved when migrating from SP 2010 (CSOM) to SPO (CSOM).	00149449
296436	SharePoint Edition	When migrating from SP 2013 (DB) to SPO (CSOM), Document Library Web Parts are failing to migrate with a "The serialized data is invalid" message.	00144520

301991	SharePoint Edition	Migrating from SP 2013 (MEWS) to SPO (Azure), the top level site link is missing from the Global/Top bar navigation.	00146804
304765	SharePoint Edition	When migrating OneNote from SP 2013 (DB) to SPO (Azure) and demoting a Site Collection to a Site, if the "Copy other Root files/folders" option is selected then a folder for the OneNote is added under the library instead.	00146670
305446	SharePoint Edition	When Pasting a site as a Site Collection, the "Change Language" option in the Site Collection Options Tab is disabled.	00144374
307142	SharePoint Edition	Migrating InfoPath lists that use UDCX (Data Connection Files), the link correction is not properly updating the link between the list and the InfoPath form in the Manifest.xsf file.	N/A
308140	SharePoint Edition	Documents that have invalid hex characters in the Title, CheckinComments, and/or ModerationComments property fields are failing to migrate from a DB source connection.	00149289
305690	SharePoint Edition	Migrating Content Type workflows from SP 2013 to SP 2013 throws an "Source List Id '00000000-0000-0000-0000-000000000000' is not available on target" warning in the migration logs.	N/A
306765	SharePoint Edition	In SharePoint 2010 (only) when running a copy/paste operation for SharePoint objects (site, list, library, etc.) the migration will skip adding some user accounts on the target if the target is a host named site collection.	N/A
