We want to hear from you. Send any comments regarding this document to support@metalogix.com.

The level of technical support provided depends upon the support package that you have purchased. Contact us to discuss your support requirements.

Release Highlights

New Feature	Why It Is Important
Advanced Filter Options for E-Mail filtering	Filtering for e-mail addresses or words in the subject or body text has been included in the UI so that these filters no longer need a VB script.
New E-Mail Notification Service	The new notification service now allows customers to configure an e-mail notification that provides an overview of the following components by e-mail. <ul style="list-style-type: none">• License Status• User statistics• Job monitoring The notifications can be scheduled on a job.
New Installation Wizard	The installation provides a new wizard, which greatly simplifies the installation.
ArchiveWeb Global Settings Management	ArchiveWeb provides a new function to configure all profile settings for all users. The administrator has the option to set the configuration (for example language, start page, items per page, etc.) for all users.
Windows Server 2016 and SQL Server 2016 Support	SQL 2016 has been tested with Archive Manager 7.4 compatibility. Windows Server 2016 has been tested and is supported.

	115548	PamHSM: E240 A file could not be stored in Amazon S3

Upgrade Notes

Only upgrades from Archive Manager 7.3 are supported. If more Metalogix Archive Manager products are present or use the same components in a distributed architecture, all have to be updated to the same version. Because of database model changes in version 7.4, database upgrade can take a considerable amount of time. Full database backup before the upgrade is strongly recommended.

Support Notes

As per Metalogix Service Level Agreement, only last two released versions of a software product are supported. This means only Metalogix Archive Manager 7.3 and Metalogix Archive Manager 7.4 are supported. Metalogix may support older versions of software products when possible as a professional service. Contact your sales representative for further information.

End of Support Notice

Metalogix Archive Manager Exchange Edition, Metalogix Archive Manager Files Edition and Metalogix HSM do not support installation on Windows Server 2003 (all versions), Windows Server 2008 (all service packs) and Windows Server 2008 R2 without Service Pack. Windows Server 2008 R2 SP1 is the minimal version supported by Metalogix Archive Manager Exchange Edition, Metalogix Archive Manager Files Edition and Metalogix HSM 7.4.

Metalogix Archive Manager Exchange Edition no longer supports Microsoft Exchange 2003 and Microsoft Outlook 2003.

According to the Microsoft Lifecycle Policy, the support for Exchange Server 2007 ends on 11. April 2017. We highly recommend that all customers migrate to a supported Exchange version.

Please refer to System Prerequisites document for more details.

Maintenance Mode

With the upcoming release, Metalogix Archive Manager will no longer support the following features:

- **Send Items Job**
- **Direct Archive Job**
- **Exchange Server 2007**
- **Metalogix Archive Manager Outlook 2007 Add-In**
- **Quota Settings in Group properties**
- **HSM E-Mail Notification**

If you have any questions, please get in touch with our Technical support specialists by email at support@metalogix.com or by phone at 1.202.609.9100.
