- Windows Server 2012
- Windows Server 2012 R2
- Windows Server 2016

- **.NET Framework 3.5**

- **.NET Framework 4.5**

- **IIS Installation**

- Web Server / Web Server / Performance / Dynamic Content Compression
- Web Server / Web Server / Security / Windows Authentication
- Web Server / Web Server / Application Development
 - .NET Extensibility 3.5
 - .NET Extensibility 4.5
 - ASP.NET 3.5
 - ASP.NET 4.5
 - Web Server / Management Tools / IIS 6 Management Compatibility / IIS 6 Metabase
 - Web Server / Management Tools / Management Service
- Under Features check:
 - .NET Framework 3.5 Features
 - .NET Framework 4.5 Features / .NET Framework 4.5
 - .NET Framework 4.5 Features / ASP.NET 4.5
 - .NET Framework 4.5 Features / WCF Services (all checkboxes under this item)

Database Requirements for Archive Manager Files Edition Server

- Microsoft SQL Server 2008 R2 or higher
- Oracle 11g and 12c
 - Oracle clients (x86 and x64 required on Archive Manager Server - Installation type: Administrator)

Supported File Server (Sources)

- Windows Server 2008 R2 SP1
- Windows Server 2012 / Windows Server 2012 R2
- Windows Server 2016
- NTFS including mount-point support
- ReFS

Supported Storage Devices (Source)

- NetApp Filer
- EMC VNX

Supported Clients

- Windows Clients
- Macintosh clients when CIFS/SMB protocol is used
- AFP protocol (e.g. ExtremeZ-IP software)

Supported Web Browsers for ArchiveWeb

The following web browsers have been tested and are fully supported:

- Microsoft Internet Explorer 10 or higher
- Microsoft Edge
- Mozilla Firefox 16 or higher
- Chrome 33 or higher
- Opera 12 or higher

Hardware requirements

Note: The table shows the minimum requirements.

Component	Minimum specification	Recommend specification
Number of Processor Cores	4	8
Main Memory	4 GB	12 GB
Hard Disk	10 GB	10 GB

Additional Information

- Archive Manager Files Edition must be installed on the Windows file server where archiving is planned.
- For remote archiving (Windows shares, NetApp or VNX), we recommend installing the software on a dedicated server.
- Installations on Domain Controllers **are not supported**
- The software installs web applications into the Default Web Site by default. This can cause conflict with other applications like Microsoft CRM or SharePoint. To change the installation website, manual changes are required after the installation. Please contact support in such cases.
- The application, log files and cache folders require 10 GB of HDD space. The space for the database and the file store must be calculated from the amount of the archived messages.
- Metalogix Archive Manager is fully supported in a virtualized environment.
